Abdikani Farah

FULL-STACK MERN DEVELOPER | AI-FIRST ENGINEER

Mogadishu, Somalia
github.com/Abdikani-Farah
linkedin.com/in/abdikani-farah-ali

PROFILE

Full-Stack MERN Developer building modern applications and intelligent digital experiences. I design useful interfaces, REST APIs, authentication flows, and management systems with React, Node.js, Express, and MongoDB. My current growth direction is AI-first engineering: using AI thoughtfully in development while advancing practical Python and machine-learning foundations.

CORE CAPABILITIES

FRONTEND	React, JavaScript, Tailwind CSS, HTML, CSS, Vite
BACKEND	Node.js, Express.js, REST APIs, JWT authentication, bcrypt
DATA & AI	MongoDB, Mongoose, Python, Pandas, NumPy, Scikit-learn
WORKFLOW	Git, GitHub, Postman, dashboard design, CRUD systems

SELECTED PROJECTS

Farmer Market Connection

Role-based marketplace that connects farmers with buyers and supports practical commerce workflows.
Stack: React, Vite, Tailwind CSS, Node.js, Express, MongoDB

Car Parking Management System

Dashboard-driven parking operations system for spaces, vehicle flow, payments, and reporting.
Stack: React, JavaScript, Node.js, Express, MongoDB

Inventory Management Project

Management workspace for products, purchases, sales, suppliers, customers, and stock decisions.
Stack: React, JavaScript, Node.js, Express, MongoDB

Product Management System

Inventory-focused product dashboard for product entry, stock tracking, and low-stock review.
Stack: HTML, CSS, JavaScript

EXPERIENCE & LEARNING

2025 - Present

Full-Stack MERN Developer
Independent Projects - Building practical web applications and management systems with clean user workflows, REST APIs, authentication, and MongoDB.

2026 - Present

AI & Machine Learning Learner
Continuous Learning - Developing foundations in Python, data preprocessing, regression, model evaluation, and AI-assisted development.
